Evaluation criterium 11: Invalid foreign keys (Lieferadresse has unknown Kunde)

The first delivery contains delivery addresses for which there is no record with the same customer ID (KundeID) in CUSTOMER (Kunde - KundeIDs 999, 998 and 997).

As part of the standard Raw Vault implementation, one of the sources of CUSTOMER_H is also the customer-column in delivery-address. That way the three relevant rows are correctly loaded into all the entities shown on the right.
