# Key figures (14.1)

- To get the key figures, we utilized the fact table and associated dimensions

- Fact table F_ORDER_LINE was created
  - Fact table is loaded with MERGE-pattern, meaning updates and deletions in the data are correctly shown in the key figures

- Also, a second fact table F_ORDER_LINE_INCREMENTAL, was created to take snapshot of the data in each reporting date

- Dimensions were done with snowflake-pattern

Key figures (14.2)

Databricks dashboard was created from the key figures

Revenue by source and reporting date
Deleted records are taken into consideration in the figures.
